

## **FREE WATER SAFETY PRESENTATION**

Catch the Wave staff will come to your child's school and give a **fun and interactive** presentation about safer behavior in, on, and around the water and provide key water safety information for their parents. The program is especially critical to preschool through early grade school aged children (ages 4-7) the statistics show that children of this age group are at the most risk of unintentional drowning and near drowning incidents. The presentation usually lasts between 15-30 minutes.

**Safer three\*** and **Catch the Wave Swim for Life Foundation** are **Non-profit organizations** dedicated to saving lives through drowning prevention and water safety education. **We believe that an ongoing, year-round, educational campaign** is necessary in order to significantly reduce the number of drowning incidents, not only in the United States, but around the world. Drowning IS preventable...
