

Hononegah Community High School Fieldhouse Renderings

At a joint meeting of the Building & Grounds Committee and Finance Committee on Wednesday, March 1, DLA Architects presented preliminary conceptual renderings of the proposed fieldhouse that could be built if the April 4 referendum bond issue is approved. The renderings illustrate what a fieldhouse of this size would look like on the campus and what features and amenities could be included. Should the referendum pass, schematic designs and construction documents, which include the very specific details of the building, would be developed during a process that would include input from the community. Then, building of the fieldhouse would begin. You can see these and more images on the referendum tab of the website: www.hononegah.org.
