

PEAK SOCCER

Peak Youth Soccer Developmental League was developed by our coaches at Peak Soccer Academy under the guidance of Jean Pierre Tokoto. J.P. is a retired Cameroonian professional footballer who competed for the Cameroon national football team at the 1982 FIFA World Cup. In 2006, he was selected by the Confederation of African Football as one of the best 200 African football players of the last 50 years.

This developmental program is specifically designed to teach beginning soccer skills to new players (and parents) to help them understand and enjoy the game of soccer. Making new friends and learning sportsmanship are cornerstones taught by our coaches. Our program is unique as it provides three parts:

- The first part of our program is professional instruction on one skill set per week. We believe focusing on one skill set per week allows the player the ability to work on one part of the game under the supervision of a certified coach. Younger ages need time to process the skill and then work instructions on how to practice what they have been taught. We feel this is the best way for kids to pick up essential techniques of the game. As weeks progress, the kids will be able to merge past weeks experiences together to give them a great deal of accomplishment throughout this entire program.
- The second part of this program is weekly games that follow the skill training. All our games are monitored by our licensed coaching staff as well as club players to encourage your child's development. Our games are meant to be fun and filled with personal accomplishments.
- The last part is an awards ceremony (after completing the last night of games) where your child will be recognized by our coaches and club players for their completion of the program. We believe each child needs to be rewarded for their accomplishments and commitment.
